Gate at level 30 keeps more players at Day 7 (19.0% vs 18.2%). Day 1 is inconclusive.

Players	Day-7 retention	Day-1 retention
90 189	18,61 %	44,52 %

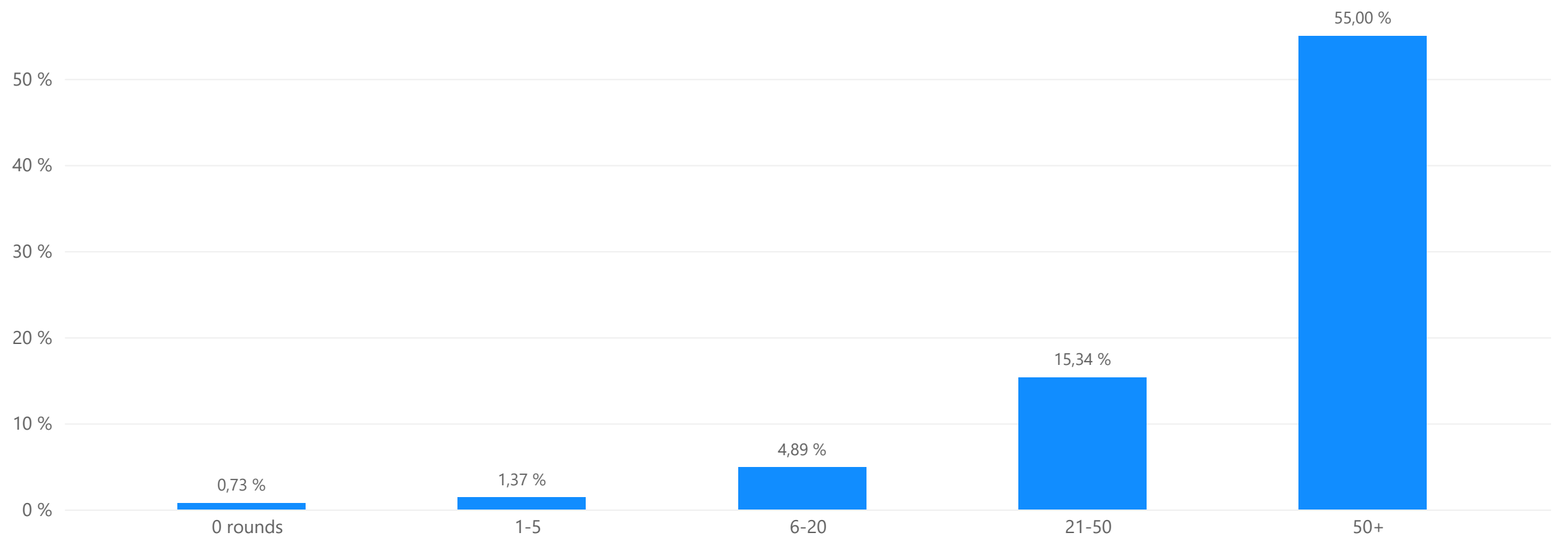

Retention by game version (95% CI)

A/B test: gate_40 minus gate_30 (percentage points), two-sided z-test

Indicator	Difference (points)	p-value	Conclusion
Day 1	-0,59	0,0744	Inconclusive
Day 7	-0,82	0,0016	gate_40 retains less (significant)

Day-7 retention rises sharply with engagement.

Public datasets (Kaggle). Retention is not revenue; the A/B groups differ slightly in size (sample ratio p = 0.009). Segmentation check (notebook 03): no usable player segments in the behaviour data.
